FEATURES

4D joystick

Quick switch control for
4 cameras

LCD display

Control protocol: IP
VISCA, VISCA, PELCO
P/D, NDI, ONVIF

Boat switch design

255 presets

POE

3-year warranty

Boom GOJO offers the ultimate in camera control with 4-dimensional joystick to control pan, tilt, zoom functions as well as speed. Easily adjust focus, color, PTZ and shutter speed with quick-adjust knobs and quick buttons, program camera presets and shortcuts. 4 camera select buttons toggle control seamlessly for the ultimate camera control in broadcast and live event settings.

3..2..1..Action!

GOJO seamlessly controls multiple PTZ cameras on a single network making it an ideal solution for broadcast and live events. Quickly switch between 4 cameras (up to 255) to control PTZ functions manually or via programmed presets.

Ultimate control

Enjoy quick switch control for four cameras with dedicated buttons and control for up to 255 cameras total. The ergonomic joystick allows for direct control of full PTZ functions including speed control. Additional quick control buttons adjust focus, BLC, red and blue, white balance, pan/tilt speed and zoom speed with ease.

Flex

GOJO offers multiple connectivity options. Deploy IP Control with ONVIF, IP VISCA, NDI and Serial Port Control through PELCO and VISCA. Connection ports include LAN/PoE, RS232, RS422/RS485 and Tally/Contact.

BOOM GOJO

Designed and built for broadcast and live events.
